

## **Task 1: Project Administration**

Objective: To effectively administer, coordinate, and monitor all work performed under this project including technical and financial supervision and preparation of status reports.

## **Task 2: Quality Assurance**

Objective: To develop data quality objectives (DQOs) and quality assurance/control (QA/QC) activities to ensure data of known and acceptable quality are generated through this project.

## **Task 3: Public Outreach, Education, and Involvement**

Objective: To educate, identify, engage and gain stakeholder support for the characterization of Davidson Creek, Middle Yegua Creek and Deer Creek watersheds.

## **Task 4: Data Acquisition and Evaluation of Existing Data for Pollutant Characterization and Source Identification**

Objective: To collect data and information to identify causes and sources of water quality impairments, issues in the watershed, and estimate loading reductions needed to meet water quality standards.

## **Task 5: Water Quality Monitoring for Watershed Characterization**

Objective: To collect surface water quality and flow data to supplement LDC analysis and better characterize impairing parameters within the watershed.
