

# NEED HELP WITH WATERSHED PLANNING?

With more than two decades of combined watershed-based planning experience, the Texas Water Resources Institute (TWRI) has the experience, expertise, organizational skills and knowledge to efficiently guide stakeholders in developing science-based and stakeholder-supported plans necessary for restoring local water bodies.

**Our team is a statewide leader in coordinating and implementing watershed programs, with expertise to:**

- Gather data to characterize the watershed
- Collect and analyze water quality data
- Identify and evaluate pollutant loadings
- Raise awareness through water quality education and outreach
- Assist in selecting appropriate management measures
- Draft the plan for your organization using your feedback
- Coordinate implementation of the completed plan
- Help secure funding for planning and implementation

**Contact:**

**Dr. Kevin Wagner**, TWRI Associate Director  
(979) 845-2649, [klwagner@ag.tamu.edu](mailto:klwagner@ag.tamu.edu)

**Lucas Gregory**, TWRI Project Specialist  
(979) 845-7869, [lfgregory@ag.tamu.edu](mailto:lfgregory@ag.tamu.edu)

**TWRI uses  
common-sense,  
cost-effective  
approaches to  
restore water quality.**
