NRI develops new reporting tool for wild pigs

A new feature on Texas A&M Natural Resources Institute's wild pig website offers Texas landowners and homeowners an easy-to-use tool to report sightings of wild pigs and the damage that may have occurred. [Read more.](#)

Master Irrigator program: From demonstration to adoption

Agricultural water conservation is extremely important, especially in the Ogallala Aquifer region. Targeting the agricultural water users in the North Texas area, a program began in 2016 that focuses on conserving irrigation: the Master Irrigator program. [Read more.](#)

The Eagle cites NRI on Texas Tribune's Preserving Natural Resources panel

In a two-day event organized by the Texas Tribune, more than 200 officials, agriculture stakeholders including NRI's director Dr. Roel Lopez, and residents from across the state gathered to discuss and answer questions about challenges and opportunities facing rural Texans. [Read more.](#)

TWRI and NRI work together to foster and communicate research and educational outreach programs focused on water and natural resources science and management issues in Texas and beyond. TWRI and NRI are part of [Texas A&M AgriLife Research](#), the [Texas A&M AgriLife Extension Service](#) and the [College of Agriculture and Life Sciences](#) at Texas A&M University.

Conservation Matters publishes timely information about water and natural resources news and research at universities and organizations in Texas. If you have information for possible inclusion in *Conservation Matters*, please contact Kathy Wythe at kwythe@tamu.edu. All submissions may be edited for grammar and style.
